BACKGROUND & INTRODUCTION

I am a computer science undergraduate student from Sudan, currently studying at Yonsei University Seoul, South Korea. I have been actively coding for about 5 years now. I am interested in all things about software development and seeking internships that will help me grow further in this field.

EDUCATION

Yonsei University, Seoul South Korea - College of AI, Computer Science and Engineering Department

March 2022 - PRESENT

Expected graduation year: 2026

GPA: 3.3

EXPERIENCE

Freelancer - *online*

March 2020 - PRESENT

I have been working as an online freelancer for about three years now. I am particularly experienced in the process of developing and deploying web applications using different frameworks and technologies.

Seoul Tech Impact Hackathon - *online*

November 2023

Participated in the Seoul Tech Impact Hackathon 2023 as a member of a collaborative team, contributing to ideation, solution development, and presentation focused on addressing technological social impact.
